The Emirates A380 has landed at Mini-Europe

Brussels, Belgium, 28 May 2026 – The Emirates A380 has touched down at the airport in Mini-Europe, bringing one of the most recognisable aircrafts to Brussels' captivating world of miniature monuments, displays, and animations.

The Emirates A380 model has been replicated in perfect detail, taking over 60 hours of intricate craftsmanship by Mini-Europe's expert modellers, to capture the distinctive features of the A380 and iconic Emirates livery.

Custom-made at a scale of 1:25, the aircraft still measures nearly three meters in length (292 cm) with an impressive wingspan of 320 cm and a height of 45 cm. From the proportions of the fuselage to the fine details of the livery, the model highlights the expertise and craftsmanship that define Mini-Europe's creations.

As the world's largest international airline and the world's largest operator of the A380, Emirates continues to celebrate the enduring appeal of the double-decker aircraft, which has become synonymous with its premium travel experience and global connectivity.

Jean-Pierre Martin, Emirates' Country Manager in Belgium said,

“The Emirates A380 has become more than an aircraft – it symbolises the magic and joy of travel and exploring the world. This new display at Mini-Europe helps bring that experience closer to visitors, offering a unique way to experience our flagship aircraft up close, while also celebrating our longstanding connection with Europe.”

The arrival of the Emirates A380 marks a new step for Mini-Europe, which continues to celebrate not only Europe’s cultural heritage but also its connections with the rest of the world. Aviation, and particularly long-haul travel, plays a key role in bringing people and cultures together—values that are fully aligned with the spirit of the park.

Vinciane Meeùs, Managing Director of Mini-Europe states, “At Mini-Europe, the journey begins right now: we invite visitors to admire this iconic aircraft and start imagining themselves on board, heading for their next destination. With this emblematic miniature A380, we are proud to showcase Emirates, a symbol of global connectivity with Europe, as well as Airbus, a key partner in European innovation. “

Emirates has been serving Brussels for over 11 years and has carried over 3 million passengers to and through Dubai. Over the years, Emirates has consistently enhanced its passenger offering, adding a second daily frequency and bringing its latest aircraft to Belgian skies, including the fully retrofitted Boeing 777, equipped with Premium Economy. In 2018, the airline operated a special one-off A380 flight into Brussels Airport, to celebrate the inauguration of the airport’s first A380-capable gate.

Visitors can discover this exciting new addition to Mini-Europe by booking their visit here. Customers wanting to explore the full-size Emirates A380 can book tickets on emirates.com, the Emirates App, or via travel agents.
